I am commenting on the Microsoft anti-trust case. Please accept the settlement on the table and end the witchhunt. I can't believe that in America if you build a better product and proceed to whip everybody's butt in the marketplace that you end up in court over it. What kind of message is this sending to would be entrepreneurs in the greatest country in the world? We are not (yet) a socialist country and freedom to make the best products and the most profits must be preserved. End it now. Thank you for accepting my comments.

Sincerely,
